'Key Sheet' – Working Scientifically

Year Group; 1

Key Skills	Key Content
• Suggest what might happen and ways to test ideas • Make observations using appropriate senses. • Explore using the five senses. • Make simple comparisons and groupings. • Collect evidence to try answer a question • Communicate findings in simple ways.	During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content: • Asking simple questions and recognising that they can be answered in different ways • Observing closely, using simple equipment • Performing simple tests • Identifying and classifying • Using their observations and ideas to suggest answers to questions • Gathering and recording data to help in answering questions.
Key questions	**Key Vocabulary**
• How could we find out the answer? • What do you think will happen? • What did you… (see, hear, smell, touch, taste) • What does that … (feel like, look like etc.) • How is the (touch, taste etc.) of… different from…. • What happened/what did you notice?	Test Grouping Comparing See Smell Taste, Feel Hear
